

A SECOND LEASE OF LIFE. AND THEN, THE JOY OF MOTHERHOOD

A transplant helped Babitha overcome her liver failure and get a second chance of a healthy life. Two years after her liver transplant, her happy life became almost perfect when she delivered a baby boy.

Apollo Institutes of Transplant - Centres of Excellence that work tirelessly to give patients new beginnings, new life.

The Apollo Institutes of Transplant is the busiest solid organ transplant program in the world. Cutting-edge excellence is a hallmark of the Apollo Institutes of Transplant; this unwavering focus on perfection and innovation is driven by a team of the finest experts in the field. Wide multi-disciplinary experience, advanced infrastructure and best-in-class protocols work together to ensure that Apollo Hospitals is constantly pushing the envelope in the most complex transplant cases in the region.

Apollo Hospitals performs more than four transplants every single day with outcomes that are setting the benchmark, across the world. The Apollo Institutes of Transplant have been true pioneers in the field; they have several milestones that have shaped the transplant ecosystem in India.

- 1st successful paediatric liver transplant in 1998
- 1st successful adult cadaveric transplant in 1998
- 1st successful liver transplant for acute liver failure in 1999
- 1st combined liver kidney transplant in 1999
- 1st successful liver transplant for HIV
- Youngest paediatric liver transplant in India
- 1st successful liver transplant for Hepatitis B without using immunoglobulin
- 1st successful liver transplant for Crigler Najjar Syndrome
- 1st successful living liver transplant for portal biliopathy

The simultaneous Kidneys-Pancreas transplant, Heart and Liver transplant and Heart and Double-Lung transplant are some of the recent successful firsts that Apollo Hospitals has performed.

Everyday this team of champions helps someone achieve a new start; a new lease of life. There is no better example of the magic of hope, the miracle of medicine.
