ABOUT THE CONFERENCE:

Nephkids CME & Electrolyte Workshop, started in 2007, is an exclusive Paediatric Nephrology CME envisioned to revisit the basics in the diagnosis and evolution of common kidney problems in the community and the current therapeutic methodology to deal with them. The conference also aims to create a platform to discuss recent advances & best practices in the treatment of kidney diseases in children and present unique / challenging cases for clinical analysis.

This conference is aimed at Paediatricians and postgraduate students in Paediatric Medicine, Paediatric Nephrology, Paediatric Intensive Care & Adult Nephrology.

We have put in our best efforts to familiarise Paediatricians on the importance of early diagnosis and treatment of kidney problems in children. We have poured in our energy to make the conference a grand success over the last few years and look forward to your active participation in making this year's conference too a success.
