# 7<sup>th</sup> RADIOLOGY RESIDENT'S 'HOT SEAT' REVIEW COURSE – 2018

Date : 16<sup>th</sup>, 17<sup>th</sup> & 18<sup>th</sup> August 2018

Venue : Auditorium, Indraprastha Apollo Hospitals, New Delhi

Dear Students,

We have organized 7<sup>th</sup> Radiology Resident's 'Hot Seat' Review Course on 16<sup>th</sup>, 17<sup>th</sup> & 18<sup>th</sup> August 2018 at Auditorium, Indraprastha Apollo Hospital, New Delhi, INDIA.

7<sup>th</sup> Radiology Resident's 'Hot seat' Review Course is an exam-oriented comprehensive course for post-graduate Radiology students with multi-system, multi-modality course curriculum. The highlights of the course include 'Case-based system-wise HOT-SEAT Review Sessions' and 'VIVA Sessions on unknown case films' for real-exam simulation along with individual feedbacks. Demo sessions will cover 'Drugs & Devices in IR', 'Radiological Contrast Media', 'Radiological Procedures' and 'Radiography/Radiation Equipments'. The demo session on Radiological procedures will specifically cover BARIUM studies – technique and interpretation. 'Short teaching sessions' and 'Spotters Sessions' are other key components of the course.

Based on the feedbacks received during the previous courses, we have included extensive late evening spotter sessions with discussions during this course to ensure emphasis on this crucial component of Radiology examinations. With an objective to maximize the learning opportunities during the course duration, we have incorporated extended course timings from 8:00 AM to 8:00 PM on days 1 & 2 and from 8:00 AM to 6:00 PM on day 3.

This three-day course is primarily aimed at Radiology residents who will be appearing for their MD, DNB or DMRD examinations or any other post-graduate course in Radiology. Certificates of Appreciation will be given to the registered students based on their performance during the 'hot-seat reviews'. Top-scorers award and Spot prizes will be given for the Spotter sessions. Certificates of Distinction will be awarded to the top three students for overall outstanding performance during the course. Soft copy of select course material will also be provided.

This comprehensive exam-oriented preparatory course is an excellent opportunity for post-graduate Radiology students to enhance their performance in the forthcoming examinations.
